BLACK BEETLE DRIVE BOGIES HO/OO, EM, P4, On3, S and O GAUGE

- Powered by Mashima 1220 or 1224 flat can motor. Wheelbases from 25.5mm to 40mm in steps of 0.25mm.
- Wheelbases from 25.5mm to 29.5mm use the Mashima 1220 motor. Speed at 12V is approximately 3 scale miles per hour per scale inch of wheel diameter with 15:1 gearing.
- Wheelbases from 29.75 to 40mm use the Mashima 1224 motor. Speed at 12V is approximately 2 scale miles per hour per scale inch of wheel diameter with 15:1 gearing.
- Gear ratio of 27:1 is also available where slower speeds are required. Minimum wheelbase is also reduced with 27:1 gearing down to 23.75mm.
- Height of centre pivot above rail is 12.4mm plus half the wheel diameter. eg. with 10.5mm wheels the centre pivot is approximately 17.6mm above the rail level.
- All have flush axles as standard. HO gauge uses 20mm long axles, EM and P4 use 21.8mm and On3 uses 22.6mm.
- A bracket is included to which side frames may be fixed. (NOTE: side frames are not included)
- Wheel options: 9.6mm disc

Price for custom assembled Dummy Beetle

Includes pick - ups, but no motor or gears.

27.00

BLACK BUG DRIVE UNIT

The Black Bug is a compact single axle drive unit using the same gearbox as the Black Beetle and a Mashima 1220 motor. Gearing may be either the standard 15:1, as fitted to the Black Beetle, or a second set of spur gears can be provided to increase the overall gear reduction to 27:1. Wheel choices are the same as the Black Beetle, or the Black Bug can be provided without wheels. Axles are 2.00mm in diameter and a 25mm long pinpoint axle is fitted as standard. Electrical pickups are not included.

Custom assembled Black Bug with standard 15:1 gearing. \$66.00 When ordering please specify wheel diameter, disc or spoked, wheel profile and track gauge.

Custom assembled Black Bug with 27:1 gearing.

GENERAL NOTE REGARDING WHEEL SETS: The range of wheels is being rationalised. When the narrow gauge wheels WN1-4, the 9.6mm wheels W1-3 and some of the RP25-88 wheels WF1-9 are sold out they will be discontinued.

NOTES ON AXLE LENGTHS

16.00

16.00

16.00

23.8mm axles are commonly used on HO scale models where it is desired to keep width over axleboxes to a minimum eg. finescale standard gauge models. 25.0mm axles are used in S.E.M. 4 wheel wagon kits, bogies B1-B8 and B11 and bogies by AR kit Co. This length also suits LIMA and Powerline and many Chinese made models.

26.0mm axles are used in most U.S. and British models such as Atheam, Roundhouse, Hornby and Bachman Branchlines.

Order direct at RRP. Please add \$9.00 post pack within Victoria. If order is over \$200.00, postage within Victoria is free. Postage on interstate orders will be determined by weight and destination. Pay by cheque, postal note, Visa, Mastercard or direct deposit.
